

## Lab 8 — Muscle Histology & Axial Muscles

For all muscles, be able to identify them on a model, know general know origins or insertions (main bones but not specific markings), and know their main actions (blue text).

### Muscle Histology Model:

- Endomysium
- Mitochondria
- Myofibril
- Nucleus
- Sarcolemma
- Sarcoplasm
- Sarcoplasmic reticulum
- Terminal cisterna
- Transverse tubules
- Neuromuscular junction:
  - Glial Cell
  - Motor end plate
  - Motor neuron axon
  - Myelin sheath
  - Synaptic cleft
  - Synaptic vesicles

### Muscle Slide (look for cs views of skeletal muscles)

- Muscle fiber (in cross section view)
- Endomysium
- Perimysium
- Epimysium
- Fascicle

### Neuromuscular Junction

- Muscle fiber
- Muscle fiber nucleus
- Motor end plate
- Motor neuron axon

### Muscles of the Head & Shoulder Model:

- Epicranius (= Frontalis/Occipitalis for frontal/occipital bellies, respectively)
- Orbicularis oculi\*
- Levator labii superioris
- Zygomaticus (major & minor)
- Risorius
- Depressor anguli oris
- Orbicularis oris\*
- Buccinator
- Masseter\*
- Temporalis\*
- Lateral Pterygoid
- Medial Pterygoid
- Sternocleidomastoid\*
- Scalenes\*
- Digastric
- Omohyoid
- Sternohyoid
- Pectoralis major\*
- Deltoid\*
- Pectoralis minor
- Trapezius\*
- Levator scapulae
- Rhomboids (major & minor)
- Splenius

### Muscles only on the “Muscle Man” Model

- Serratus anterior
- Rectus abdominis
- External oblique
- Latissimus dorsi
- Infraspinatus
- Teres major

\* = also know on “muscle man” model

## Lab 9 — Muscles of the Limbs

*For all muscles, be able to identify them on a model, know general know origins or insertions (main bones but not specific markings), and know their main actions (blue text).*

### Muscles on the Arm Model (Tables 12.4-6):

Deltoid\* (Table 12.3)  
Infraspinatus\*  
Supraspinatus  
Teres major\*  
Triceps brachii\*  
Biceps brachii\*  
Brachioradialis  
Pronator teres  
Flexor carpi radialis  
Palmaris longus  
Flexor carpi ulnaris  
Extensor carpi radialis longus  
Extensor carpi radialis brevis  
Extensor digitorum  
Extensor carpi ulnaris  
Abductor pollicis longus  
Extensor pollicis brevis

### Muscles on the Leg Model (Tables 12.8-10):

Sartorius\*  
Adductor longus\*  
Adductor magnus  
Pectineus\*  
Gracilis\*  
Rectus femoris\*  
Vastus lateralis\*  
Vastus medialis\*  
Tensor fasciae latae\*  
Gluteus maximus\*  
Gluteus medius\*  
Biceps femoris\*  
Semitendinosus\*  
Semimembranosus  
Fibularis longus (= peroneus longus)  
Fibularis brevis (= peroneus brevis)  
Tibialis anterior  
Extensor digitorum longus  
Gastrocnemius\*  
Soleus  
Flexor digitorum longus

\* = also know on “muscle man” model
